GOVERNMENT OF INDIA

16 DEC 2021

Dear Dr Mane :

It is a matter of concern that non-communicable diseases including cancer are emerging as major public health hazard in India. These lifestyle-related diseases have a long latent period and need specialized infrastructure and human resource for treatment. Empowering people and communities is a core component of primary healthcare; this is especially true in rural areas.

2. I am very happy to know that Dr. Mane Medical Foundation & Research Centre, Rahuri, Ahmednagar, Maharashtra has been giving free medical treatment to the needy and under-privileged sections of the society since its inception in 2010, especially with regard to cancer. I am also informed that your centre has been conducting cancer awareness and detection camps in rural areas from time to time.

3. Under your able guidance and supervision, Dr Mane Medical Foundation & Research Centre has done well and, I am sure, it will continue in providing selfless and noble service to the motherland. I hereby convey my best wishes to you, your colleagues & subordinates for future endeavours.

With regards,

Yours sincerely,

[NISITH PRAMANIK]

Dr. Swapnil Mane
President and CEO
Dr Mane Medical Foundation & Research Centre
